

Mixing Nature in Multiple Tracks

This tutorial demonstrates how to create sessions with multiple tracks. You can create as many tracks as needed.

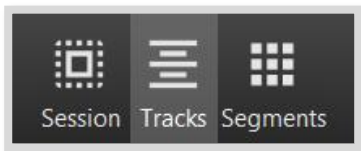

1. To add nature sounds to your session, draw a new Nature segment.

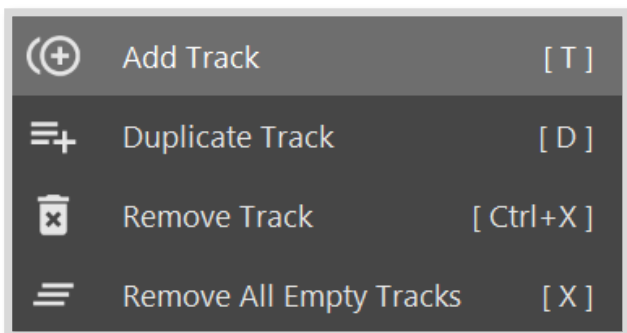

2. Click the “Add” button on the right segment properties and select a nature sound file.

3. To add a second Nature track, click the “Tracks” button in the toolbar.

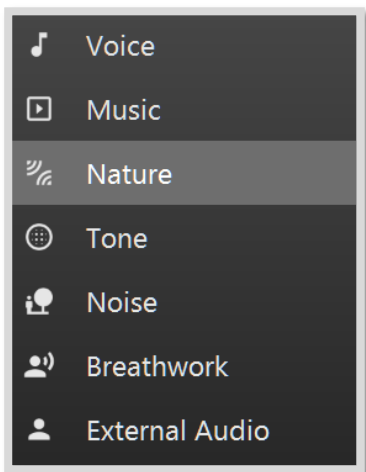

4. Click the “Add Track” option from the popup menu.

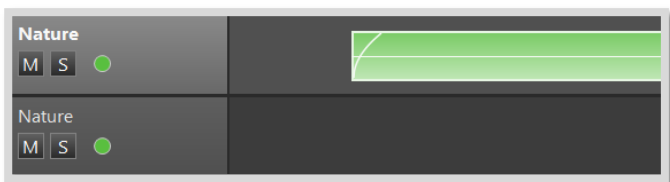

Note that keyboard shortcuts are listed on the right side of the popup menu.

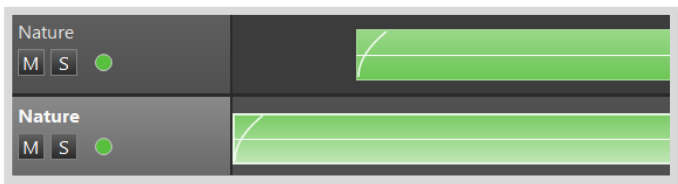

5. From the popup window, select "Nature" as the track type.

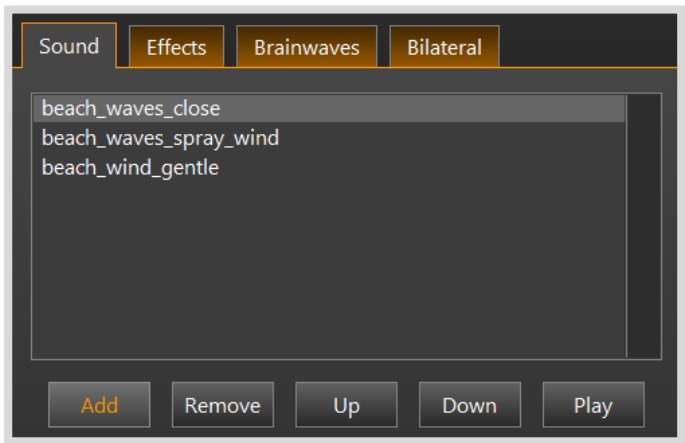

6. SHARM Studio adds a second Nature track below the first Nature track.

7. Draw a second Nature segment on the new track.

8. Add nature sound files to the new Nature segment.

9. Repeat these steps as needed to add more tracks.

You can mix different nature sounds such as streams, wind and birds.
