

Adding Voice Segments

This tutorial explains how to add recorded voice to a session. The tutorial uses built-in recorded voice files from the sound library. You will learn how to record your own voice in another tutorial.

1. Draw a Voice segment.

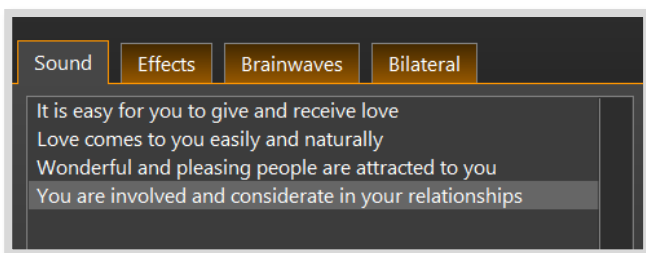

2. Click the “Add” button to add one or more recorded sound files.

3. In the file selection pop-up window, select a folder with prerecorded SHARM Studio voice files.

Name	Date modified	Type
Breathwork	10/03/2017 07:36	File folder
Framework	10/03/2017 07:36	File folder
Health	10/03/2017 07:36	File folder
Peak Performance	10/03/2017 07:36	File folder
Personal Development	10/03/2017 07:36	File folder

4. Select a file or multiple files and click the “Open” button.

To mix recorded sound files from different categories, click the “Add” button again and select more prerecorded voice files to add to the Voice segment.
